Seeding Rate 3.00 PLS Pounds Per 1000 Square Feet
 130.44 PLS Pounds Per Acre

Salt Tolerant Bio-Filter is a turf mixture adapted to use in natural vegetated swales acting as biological filters for storm water runoff. Urban runoff that drains to major river drainage basins throughout the country must collect and "treat" storm water prior to exiting the property. Research indicates that some storm water runoff can be adequately treated by collecting and filtering through grassed swales.
